

(Form O)
Petroleum Act 1923
**NOTICE OF INTENTION TO RECOMPLETE/REPAIR/ABANDON A
 COMPLETED WELL**
 (Regulations 114 and 115)

To The State Mining Engineer,
 Department of Mines and Energy
 GPO Box 194
 Brisbane Qld 4001.

GENERAL:

Well Name: Tardrum-1

Petroleum Title: ATP-685P

Lat: 25° 34' 13.21" S; Long: 150° 06' 18.10" E.

Titleholder: Santos QNT Pty Ltd

Field Grid Reference: GDA 94

Operator: Samson-International (Australia) Pty
Ltd

Target Depth: 4309 m.

Elevation Ground: 194.4 m ASL.

Plugged Back to: 1314.4 m

K.B.: 2.0 m

Drilling Contractor: Eastern Well Services Rig 2

Rig. Type: Mobile Well Servicing Rig

Register No. 770-GUZ

Service Company:

(If drilling not required)

PRESENT STATUS: Completed & shut in. See attached Workover Program
 Section 1.3 Workover Objective. Coals are to be dewatered &
 flow tested. This operation is expected to take 2-3weeks

Completion Interval 779m to 1225m **Formation:** Upper
Baralaba

Method of Completion: See attached workover program 2.3 Current Well Completion
 Schematic

Last Recorded Gauge: From March 2003 annulus flowback from Sandstones (not stable)

Oil	b/d	Choke:	ins	BSW	%:	GOR	c.ft.bbl
Gas 0.06	Mmcf/d:	STHP 300	psig	FCHP 50	psig:		°API

REASON FOR RECOMPLETION/REPAIR:

Original completion did not permit flow evaluation of the 4 coal sections perforated.
 See attached workover program section 1.3 Workover Objective. Coals are to be
 dewatered & flow tested. This operation is expected to take 2-3 weeks.

Recompletion/Repair Proposal: See attached
 program 3 Proposed Completion Design

Completion Formation: Upper Baralaba
 coal seams (4 existing sets of perforations)

Proposed Completion Intervals: EL reference use
(State depth reference adopted eg, EL, LL, MLC, etc)

	Expected Production:				
Oil	b/d	GOR:	c.ft.bbl	Gravity	°API Gas 2.0 Mmcfd

RECOMPLETION/REPAIR PROGRAM

See Attachment: Tardrum-1 Workover Program Revision 5

REASON FOR ABANDONMENT:

ABANDONMENT PROGRAM:

Date: 11/07/03

Signed

Deputy Person-in-Charge **C Rathie**

FOR OFFICIAL USE ONLY
