

EPM15219
Cottonbush No 1
Dajarra Project Annual Report to 25 February 2010
Attachment

(Mineral Resource Amendment Regulation [No. 4] 2008)

Philosophy and Objectives	Investigate a large area south of Dajarra (Dajarra Project area held under a number of EPMs) for a Mount Isa style ore deposit using the Mount Isa deposits as templates. Diamonds, phosphate and uranium are secondary targets.
Technical Summary	Assay Results – Nil Geological Data – Attached to Dajarra Project Report Geophysical Data – Interpretation of Gravity, Magnetics and VTEM data – Map and Gravity report attached to Dajarra Project Report Geochemical Data – Attached to Dajarra Project Report Drilling Data – Nil Remote Sensing Data – Ikonos, Google Earth, Aster and Landsat data used Prospect or Mineralisation – Map attached to Dajarra Project report
Program of Activities	Complied
Proposed Activities	Further investigations of Mungeraba Anomaly and RFZ anomaly (extending over EPM15046 – Smoky Creek) with drilling program designed for early 2010.
Resources	Nil
Significant Mineralisation	Nil
Expenditure	Statement submitted separately.
