

**EPM16029  
Suliaman South  
Dajarra Project Annual Report to 25 February 2010  
Attachment**

(Mineral Resource Amendment Regulation [No. 4] 2008)

Philosophy and Objectives	Investigate a large area south of Dajarra (Dajarra Project area held under a number of EPMs) for a Mount Isa style ore deposit using the Mount Isa deposits as templates. Diamonds, phosphate and uranium are secondary targets.
Technical Summary	Assay Results – Nil Geological Data – Geological map attached to Dajarra Project report Geophysical Data – Interpretation of magnetics and VTEM data Geochemical Data – Nil Drilling Data – Nil Remote Sensing Data – Quick bird, Google Earth, Aster and Landsat data used Prospect or Mineralisation – See map attached to Dajarra Project report
Program of Activities	Complied
Proposed Activities	Further investigations of Cannon Prospect and other prospects as appropriate.
Resources	Nil
Significant Mineralisation	Nil
Expenditure	Statement submitted separately.
