

## Appendix 3

### **Total contained metal in Queensland's major mineral deposits calculated from reported resource/reserve figures**

This appendix is an alphabetical listing that details the total metal content of individual deposits calculated from reported resource and reserve figures. Every effort has been made to ensure resources quoted under different resource classifications do not duplicate the total calculated contained metal values.

The purpose of this tabulation is to illustrate the metal endowment of the known mines and prospects in the state.

# Total Contained Metal in Queensland's Major Mineral Deposits

## Calculated from Reported Resource/Reserve Figures

All values recorded in tonnes **except** gold and silver which are in kilograms, oil shale which is in barrels, and sapphires which is in kilograms

|                                |             | Total      |
